

## PRESS RELEASE JEC WORLD

MARCH 2026

For immediate release

### Libeco to showcase sustainable technical linen solutions at JEC World 2026

Libeco, the premier name in Belgian Linen since 1858, is pleased to announce its participation in **JEC World 2026**, held at Paris Nord Villepinte from **March 10 to 12**. Returning to the world's leading composites event, Libeco will present its latest advancements in high-performance linen fabrics engineered specifically for the technical textiles and composites markets.

Building on over 160 years of heritage, Libeco continues to bridge the gap between traditional craftsmanship and industrial innovation. At this year's exhibition, the company will highlight its diverse portfolio of flax-based reinforcements, designed to meet the growing demand for lightweight, high-strength, and eco-friendly materials.

#### Innovation rooted in heritage

As a CO<sub>2</sub>-neutral weaving mill since 2014, Libeco remains at the forefront of the "green revolution" in composites. Their technical fabrics provide a sustainable alternative to glass and carbon fibers, offering excellent vibration damping, acoustic insulation, and mechanical properties across various sectors:

- **Sports & Leisure:** Enhancing performance in equipment such as skis, surfboards, and bicycles.
- **Transport & Automotive:** Providing lightweight, bio-based interior and structural components.
- **Design & Construction (BTP):** Offering aesthetic and structural versatility for sustainable architecture.

#### Strategic sourcing and collaboration

To ensure the highest quality of technical yarns, Libeco continues its successful cooperation with **Terre de Lin**, utilizing their specialized roving—including encapsulated parallel flax fibers, to produce high-value-added textiles. This collaboration ensures that Libeco's fabrics benefit from the finest European flax fibers, tailored specifically for complex composite applications.

#### Why partner with Libeco?

**Unrivalled expertise:** A 6th-generation family business with over 165 years of specialized linen experience.

**Local & Traceable:** Working exclusively with Western European flax and high-quality yarns, ensuring supply chain stability and premium quality.

**Commitment to sustainability:** As a certified CO<sub>2</sub>-neutral company, Libeco helps partners reduce the environmental impact of their end products without compromising on performance.

## Visit Libeco at JEC World 2026

“We are thrilled to return to Paris for JEC World 2026,” says the Libeco team. “As the composites industry moves toward more circular and bio-based solutions, our Belgian linen offers a proven, high-performance answer to the challenges of modern manufacturing.” Libeco invites all attendees to visit their booth at **Paris Nord Villepinte** from **March 10-12** to explore the future of sustainable flax composites.

---

Libeco is the largest flax weaving mill in Belgium and is ranked among the top linen manufacturers in Europe. The family business is located in Meulebeke and was established in 1858. Under the Libeco Fabrics brand name, it produces fabrics for industrial applications such as upholstery, curtains and apparel as well as technical textiles. In addition to local and sustainable production, superior quality is at the core of Libeco’s mission. The title of Purveyor to the Royal Household was attained in 2006 and in 2014 the weaving mill was awarded the carbon neutral label.
