## FALL / WINTER COLLECTION 2019

PRESS RELEASE JULY 2019 - for immediate release

Note from our designer

### UNCOMMON GROUND

Natural earth pigments range from green, to gold, to brown to red. Like linen colours, they are truly unique. After seeing countless images of these warm coloured powders, they eventually became the inspiration for this collection - UNCOMMON GROUND.

This richness of colour combined with lots of linen and wool, brought us to a very lively and colourful place this season. In addition, we were very lucky to be able to photograph in a waterside bed & breakfast in Bruges, with a lovely model called Marie and her sidekick for the day, Pickles!
